

Date	Bug	Solution
20/06/2024	changePage function not working, app crashes completely when function is called	changeFunction parameter was misspelt, changing the typo fixes bug
20/06/2024	Recipes were not displayed until after next page was clicked	Manually set original pageRecipes to first 9 recipes (page limit)
20/06/2024	Page 1 did not display first page of results, instead it displayed the second set of results	For loop for calculating total pages was incremented by 1 when being pushed to array resulting in the first set of results being skipped. Move incrementation to when the numbers are being displayed
20/06/2024	Pagination component (for switching between pages) was displayed before search was made	Only render component if result state array is not empty
23/06/2024	Hero was not displayed when search results are loading	Make hero into its own component and add it to loading component
23/06/2024	No search results text was displayed before a search was made	Make a noSearchResults state and change it through handleSubmit button which handles the search
23/06/2024	Hero font was set to default when loading	Move font change className (Tailwind Css) to Hero component
23/06/2024	Pagination component extended past screen on mobile	Build a smaller pagination component only visible on mobile
23/06/2024	Pagination buttons not working on mobile	Add onClick methods to pagination buttons
23/06/2024	Page stays at bottom after changing to next page	Add useEffect which scrolls to top of page when page data changes
25/06/2024	Cuisine field could not be empty after searching for a specific cuisine	Track if cuisineType has changed and only add the cuisine to search field if user has typed in a cuisine, reset cuisineType after search has been made
25/06/2024	Cards were at different heights if recipe title wrapped to two lines	Switch from grid to flex and use flex-grow to make cards the same height, use mt-auto to make card content same size
01/07/2024	Previous search was made again when search queries were blank	Reset search input after search is made
02/07/2024	Recipe cards were bigger than other pages if there were fewer than the max of 9 recipes per page	Add a max width for each recipe card
